V1.0				1st version

The "energy performance contracting" (Legislative Decree 115/98) is a contractual arrangement between the beneficiary and the provider concerning an intervention of improvement of energy efficiency, in which the payment of the investment is made according to the level of efficiency contractually agreed. The Province of Turin is the project leader of 2020TOGETHER, co-funded by the Intelligent Energy Programme, which aims to develop such contractual form of a plurality of buildings and public lighting systems from different municipalities of the province. The project will provide about 10 million investment in energy efficiency for the benefit of at least 60 public buildings and 2.000 points of light.

The training day, after a brief introduction on the project 2020TOGETHER, examined in detail the regulatory and legal aspects of energy performance contracting, illustrating the opportunities and challenges associated with their implementation. At the end has been presented two initiatives underway in the provinces of Modena and Teramo.
